The pos attribute of an arrow describes the position of the base (tail) of the arrow.

The axis attribute of an arrow describes the direction and length of the arrow.

sphere(pos=vector(6,6,0), radius=0.20, color=color.white)

program:

Web VPython 3.2

from visual import *

sphere(pos=vector(2,4,0), radius=0.20, color=color.white)

sphere(pos=vector(-3,-1,0), radius = 0.15,color = color.green)

```
arrow(pos=vector(2,-3,0), axis=vector(3,4,0), color=color.cyan)
arrow(pos=vector(3,2,0), axis=vector(3,4,0), color=color.red)

sphere(pos=vector(6,6,0), radius=0.20, color=color.white)
```
